DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a method of farming members of the Phylum Arthropoda.

Group II, claim(s) 10-24, drawn to a housing assembly for farming members of the Phylum Arthropoda.

2. The inventions listed as Groups I & II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II does not have a food supply to perform the step of attracting a food supply as in Group I. In addition, Group II does not have feature to perform the step of harvesting silk as claimed in Group I. Furthermore, Group I includes the step of covering the frames which could be placing a cloth or the like over the frames to cover the frame and not necessary a roof as claimed in Group II. Given the reasons above, Group II lacks the same or corresponding special technical features as that of Group I.

3. A telephone call was made to Kristopher Hulliberger on 5/11/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Mr. Hulliberger believes that it is not burdensome for the Examiner to search both Groups I & II, thus, should not be restricted. The Examiner believes that it is burdensome on the Examiner to search two inventions, apparatus and method, especially when they lack the same or corresponding special technical features as

stated above. In addition, from the MPEP, one invention is to be examined per application and not two inventions that lack same or corresponding special technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Son T. Nguyen whose telephone number is 571-272-6889. The examiner can normally be reached on Mon-Thu from 10:00am to 5:30pm.
